

The background of the entire page is a photograph of an outdoor setting. In the foreground, there is a paved path made of small, multi-colored stones (terrazzo). To the left of the path is a dense, green grassy area. In the background, there are lush green trees and a clear blue sky with some light clouds.

Aggregates: Rosso, Bianco, Nero

What is Sassoltalia?

Ideal Work has developed this unique system for even and consistent exposed aggregate paving. Ideal Work has combined historic Italian terrazzo and modern polymer technologies to produce Sassoltalia.

At a thickness of 2cm - 4cm you can use Sassoltalia on freshly placed or old concrete, making Sassoltalia the perfect product for new build construction or renovation projects.

Aggregates: Miscela Orientale

Why choose Sassoltalia?

Due to the nature of Sassoltalia it has many benefits over other exposed aggregate systems.

- Exotic Aggregates can be used with little extra cost.
- Light bright colours including white can be used.
- Thin section application for areas with fine level tolerances.
- Even and consistent aggregate and matrix exposure.
- Easy to mix and apply.
- Interior or exterior application.
- Can be polished.
- High flexural and compressive strengths.

Commercial environment.

Public Squares or walkways, Sassotitalia can blend into any natural environment. Pedestrian or vehicular traffic make great use of the anti slip finish of Sassotitalia in both wet and cold conditions. There are many happy clients that have already seen the benefits of Sassotitalia exposed aggregate paving.

Cement: Gray
Aggregates: Miscela orientale

Friendly personality.

Sassotitalia is easy to keep clean and is stain resistant. Part of the system requires one of Ideal Work Protective sealers. These sealers will enhance the colour and prevent dusting. For costal or freeze thaw environments our sealer can also protect against salt erosion.

Polish it off.

Polished concrete is fast becoming the architectural choice for interior floors and Sassoltalia fits in the same category. When sustainability or green construction is a consideration then polishing Sassoltalia could be your answer. Because of the high early strengths of Sassoltalia it can be polished sooner than most concretes.

Ideal Work at a glance.

Ideal Work Overview.

Ideal Work is the European leader in Decorative Concrete Technologies. We take great pride in quality management and we carry the ISO 9001:2000. Our state of the art manufacturing facility is kept up to date and our products are tested by independent laboratories to maintain the highest quality standards. Ideal Work has exclusive partnerships with several of the largest Decorative Concrete manufacturers in the world. These partnerships guarantee the information and technology we share are the most up to date and cutting edge of anywhere in the world.

The company has an area of approximately 5,000 square meter of which 3,000 are offices and warehouse and a large proportion given over to training and samples for clients. Training our staff and customers on all of our products and techniques is very important, we commit to over 2700 hours/man per year to training.

We have a 300 square meter indoor heated training facility for hands on training and a classroom for up to 50 people. Additional training is also given by our distributors and outlets.

Ideal Work products and technology are available through our ever expanding network of distributors and outlets. For information about Ideal Work products, becoming a distributor or where to find your local supplier, please contact Ideal Work directly.
